control

NEW

KeyBox Keycontrol.
Intelligent key cabinets.

Your Keycontrol system can include everything from a few up to several thousand keys. You can easily add strips and key space to your key cabinet, or expand the key management system with more cabinets, to meet your growing needs. Pair the IntelliPin and key together, then place them on the strip on the wall or in a cabinet. Each IntelliPin carries a unique ID, which means you can easily identify the status of individual keys directly from the web application KeyWin6.

The key cabinets have a display with a simple menu and search function. The cabinets are also equipped with battery backup, alarm and 14 key slots on each strip.

KEYWIN**6**

The KeyWin6 web application keeps track of each key via the IntelliPin key peg. The Keywin6 web app gives you total control of your system down to user and key level. Log in to your browser wherever you are and manage your system from a PC, tablet or smartphone to reserve keys. The remote management feature saves valuable time for your business and for staff who need access to a key.

Choose either locked or unlocked key slots.
